Pertemuan 4

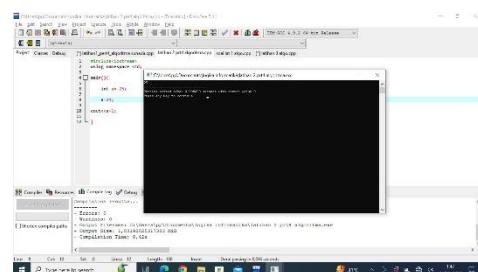

Soal aritmatika cout (_)

1.

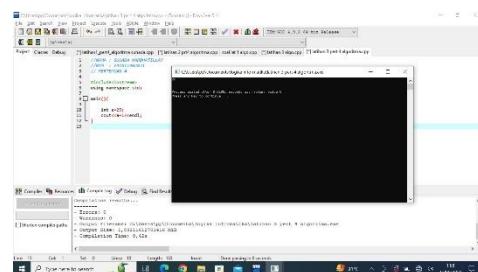

```
#include <iostream>
using namespace std;
int main()
{
    cout << "Hello World";
    return 0;
}
```

2.

```
#include <iostream>
using namespace std;
int main()
{
    cout << "Hello World";
    return 0;
}
```

3.

```
#include <iostream>
using namespace std;
int main()
{
    cout << "Hello World";
    return 0;
}
```

Soal $(a+b+c)*2$

1. 5 variabel

```
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
        System.out.println("Masukkan nilai a");
        int a = scanner.nextInt();
        System.out.println("Masukkan nilai b");
        int b = scanner.nextInt();
        System.out.println("Masukkan nilai c");
        int c = scanner.nextInt();
        int hasil = (a + b + c) * 2;
        System.out.println("Hasilnya adalah " + hasil);
    }
}
```

2.

```
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
        System.out.println("Masukkan nilai a");
        int a = scanner.nextInt();
        System.out.println("Masukkan nilai b");
        int b = scanner.nextInt();
        System.out.println("Masukkan nilai c");
        int c = scanner.nextInt();
        int hasil = (a + b + c) * 2;
        System.out.println("Hasilnya adalah " + hasil);
    }
}
```

soal latihan 4 soal

1.

```
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
        System.out.println("Masukkan nilai a");
        int a = scanner.nextInt();
        System.out.println("Masukkan nilai b");
        int b = scanner.nextInt();
        System.out.println("Masukkan nilai c");
        int c = scanner.nextInt();
        int hasil = (a + b + c) * 2;
        System.out.println("Hasilnya adalah " + hasil);
    }
}
```

```
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
        System.out.println("Masukkan nilai a");
        int a = scanner.nextInt();
        System.out.println("Masukkan nilai b");
        int b = scanner.nextInt();
        System.out.println("Masukkan nilai c");
        int c = scanner.nextInt();
        int hasil = (a + b + c) * 2;
        System.out.println("Hasilnya adalah " + hasil);
    }
}
```

2.

3.

A screenshot of a Java IDE (NetBeans) showing a code editor and a terminal window. The code editor contains a Java program with imports for `java.util.Scanner` and `java.lang.Math`. The terminal window shows the output of running the program, which calculates the value of $(A+B+C)^2$ given inputs A=8, B=6, and C=5. The output is:

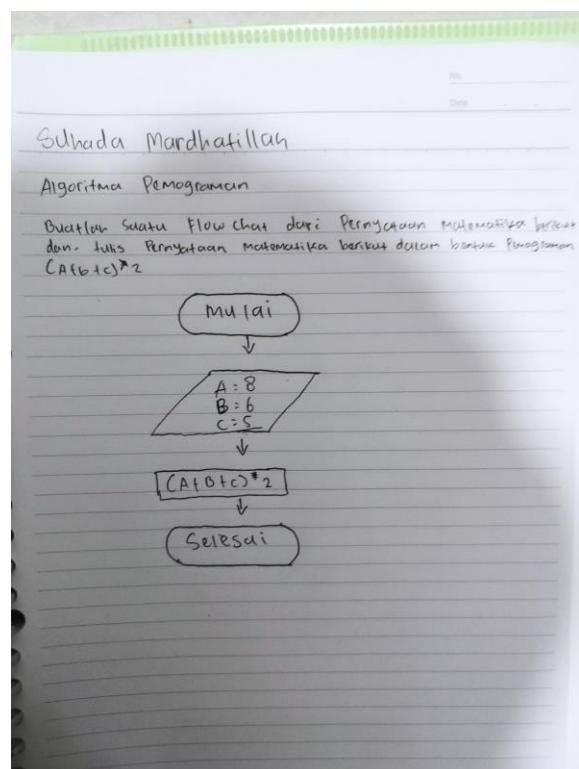

```
Process started at 12-Nov-2014 14:47:24
Process ended at 12-Nov-2014 14:47:24
Result: 169.00000000000002
Press any key to continue . . .
```

4.
